

Overview

Release 11.7.1 contains Filter and Usability enhancements, security updates and bug fixes.

New Features and Enhancements

- EP-17790 Bypass connection pooling
- EP-17889 Add option to control access to recipient white list on the Personal Dashboard
- EP-17911 – Support annotation of email released from quarantine.
- EP-17958 Add option to select all domains on Mailbox Bulk Operations when an Account is selected.
- EP-18155 - Add ability to search by rule number in the quarantine report
- EP-18242 - Include aliases in Personal Dashboard - Outbound Quarantine

Bug Fixes

- EP-17865 Scroll bar in yellow zone on Personal Dashboard is broken
- EP-17916 Group outbound settings do not immediately override outbound IP settings; one-hour delay.
- EP-17964 Message Category Summary options now include all Domains or Outbound IPs, not both.
- EP-17978 Wrong message released on PD light.
- EP-17985 Unable to update Authentication section on Branding Preferences page.
- EP-18032 Unable to remove filter exceptions from the Domain settings page.
- EP-18070 Allow the releasing of multiple inbound messages at once on Personal Dashboard.

API Changes

- None
