- EP-17889 Add option to control access to recipient white list on the Personal Dashboard
- EP-17911 – Support annotation of email released from quarantine.
- EP-17958 Add option to select all domains on Mailbox Bulk Operations when an Account is selected.

Bug Fixes

- EP-13136 Handle winmail.dat files in Park and Pull encryption service.
- EP-17382 Deferred Queue Summary Report differs from monitoring service counts.
- EP-17515 Park and Pull Encryption service reply categorized as SPAM but allowed through is not shown to the recipient.
- EP-17520 The Account Administrator role is not able to run the Mailbox report for all domains.
- EP-17560 Message subject annotation should only add markup text once.
- EP-17581 Attachment encryption console is not showing download button.
- EP-17593 Loopback message caught by SPF filter.
- EP-17622 'Allow delete of messages' permission is not working correctly on console-light.
- EP-17666 Mailbox level rate limits not applying correctly for shared outbound senders.
- EP-17678 The Dashboard Operator role is not able to run the Quarantine report
- EP-17757 Unable to access Personal Dashboard when the mailbox address contains an apostrophe.
- EP-17760 Login from Portal shows all user's accounts instead of the one he selected.
- EP-17865 Scroll bar in yellow zone on Personal Dashboard is broken
- EP-17916 Group outbound settings do not immediately override outbound IP settings; one-hour delay.

- EP-17966 Message Category Summary options now include all Domains or Outbound IPs, not both.
- EP-17978 Wrong message released on PD light.
- EP-17985 Unable to update Authentication section on Branding Preferences page.
- EP-18032 Unable to remove filter exceptions from the Domain settings page.
- EP-18070 Allow the releasing of multiple inbound messages at once on Personal Dashboard.

API Changes
