GoSecure TITAN

MAXIMIZED MICROSOFT SECURITY

GoSecure offers a unique approach to managing your Microsoft environment—through a dedicated security-first lens that few, if any, providers can match today. While others may offer generic support or infrastructure oversight, GoSecure is purpose-built to proactively defend, detect, and respond within the Microsoft ecosystem, aligning every decision and configuration with security outcomes. Whether it be optimizing Sentinel, reducing Azure costs, improving incident response or vulnerability management, we cover it all.

AWARD-WINNING MXDR

GoSecure's award-winning MXDR continues to lead the way in cybersecurity innovation. Recognized by the 2025 Global InfoSec Awards as the Best Solution for Managed XDR Security, and honoured in the 2025 Cybersecurity Excellence Awards for both Extended Detection and Response (XDR) and Managed Security Services, our platform is trusted for its depth, flexibility, and real-world results.

2025

GOSECURE TITAN® MXDR FOR MICROSOFT

[A FOUNDATION YOU CAN TRUST & BUILD UPON]

GoSecure Titan® MXDR for Microsoft identifies, blocks & reports potential breaches across Microsoft environments—leveraging native Microsoft tools like Defender for Endpoint, Sentinel, and Intune—often before the organization is even aware there is an issue. Our experienced threat hunters in the GoSecure Security Operations Center (SOC) respond swiftly to help remediate issues and optimize your Microsoft investment.

IDENTIFY

Find threats across endpoints, networks, email and the web through automated monitoring and human-led threat hunting. Identifies sophisticated potential attacks like hidden malware and negligent/malicious insiders.

MITIGATE

Experience rapid threat detection and response with GoSecure's SOC. Our SOC experts act as an extension of your in-house security team, delivering 24/7 threat mitigation based on your custom playbooks, ensuring threats are stopped before they spread.

RESPONSE

Benefit from automatic attack disruption to limit lateral movement and reduce the overall impact of an attack.

Microsoft is at the core of many enterprise environments, making its protection a cornerstone of GoSecure Titan® MXDR. Our solution was built to enhance and extend the native capabilities of Microsoft security tools, not replace them. Built on an open XDR architecture, our MXDR solution is purposefully designed to seamlessly integrate with and protect Microsoft ecosystems comprehensively. Here is some additional insight on how GoSecure Titan® MXDR ensures adaptability and security within Microsoft environments:

Triage — Filter the noise to prioritize Microsoft Defender XDR incidents and alerts that matter and alleviate alert fatigue

Investigate — Investigate and analyze the most critical incidents first and document progress and findings

Respond — Contain and mitigate incidents faster by delivering step-by-step guided and managed response, and consult on-demand

Prevent — Provide detailed recommendations and best practices to go beyond detection and response to prevent future attacks

Continuous security posture improvements

GOSECURE TITAN® MXDR ADVANTAGE

- Identifies, blocks and reports potential breaches, often before the organization is even aware there is an issue.
- GoSecure blends automation with expert-level human analysis and deep Microsoft platform knowledge to reduce false positives and strengthen your security posture.
- Continuous 24/7 automated monitoring and human-managed support protect organizations around the clock – because breaches can happen at any time.
- The GoSecure Titan® Platform aggregates and presents relevant telemetry alongside other data sources, centralizing your security health into a single pane of glass.
- Includes Endpoint, Network & Inbox protection, Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR), Threat Intelligence, Human-led Incident Handling & Threat Reporting.
- By leveraging our Open XDR strategy, GoSecure Titan® MXDR for Microsoft supports your existing Microsoft investments, including Defender, Sentinel, and other Microsoft 365 tools, through native integration or a flexible "bring your own license (BYOL)" model.

GoSecure uniquely manages your Microsoft environment with a security-first lens—optimizing Defender, Sentinel, Intune, and more to reduce risk, improve detection, and strengthen protection across identities, data, and devices. No one else delivers this depth of security expertise across the full Microsoft stack.

Endpoint detection & response	Vulnerability management	Attack surface reduction	Next generation protection	Auto investigation & remediation
