GoSECURE

GET A FULL PICTURE OF SECURITY RISKS AND GAPS

GoSecure also offers comprehensive Penetration Testing programs that help organizations assess their defenses in key areas. GoSecure Penetration Testing programs are designed to emulate risks from the real-world based on the needs of your organization.

Testing programs include:

- External Network Security
- Internal Network Security
- Web Application Tests
- Code Reviews
- Mobile App
- Wi-Fi
- Endpoint/Device Testing
- Social Engineering / Anti-Phishing Programs
- Physical Security
- SAP Testing
- Cloud Testing

GoSecure ethical hackers are Offensive Security Certified Professionals (OSCP) —ensuring that the team is meeting the highest standards in the industry for skills, expertise and testing methodologies.

GOSECURE RED & PURPLE TEAM SERVICES 2023

[Improve security posture, enhance your defenses and get expert guidance with GoSecure Red & Purple Team Services]

IMPROVE YOUR DEFENSE

When an attack strikes, it's too late to test your security controls and response capabilities. GoSecure Red & Purple Team engagements offer strategic services that help assess detection, response, investigation and future prevention abilities within an organization. These custom engagements, tailored to the objectives of your organization, assess risks and readiness to help protect against breaches.

Red Team
External Pro Attackers
Multiple Threat Vectors

Blue Team
In-house Pros
Defend Against Attacks

Purple Team
Collaborative Effort
Test, Fix, Repeat

CUSTOM-DESIGNED ENGAGEMENTS FOR YOUR ORGANIZATION

- **GoSecure Red Team** strategic engagements combine multiple available attack vectors, such as social engineering, physical intrusions and technological attacks with experienced security professionals to test the in-house capabilities of your organization.

- **GoSecure Purple Team** strategic collaborative engagements take a 'test, fix, test again, repeat' approach to rapidly improve security posture for organizations. Purple Team exercises also include targeted skill development workshops and mentoring for your team to ensure continuous long-term improvements.

- **Collaborative Threat Hunting** together with GoSecure experts on a real-word scenario, either after Red or Purple Team services or as a stand-alone, will help improve your security posture and enhance the skills of your in-house team. Engagements are designed to combine advanced skills and processes with your existing cybersecurity tools to find gaps in coverage or protection. On-demand coaching and skill development will also be provided for your threat hunting team.

BENEFITS OF RED TEAM ENGAGEMENTS

- Test current capabilities and decision-making of the team against threats developed to mimic real-world attacks.
- Organizations that invest in technology and resources such as Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR), Endpoint Detection & Response (EDR) or a Security Operations Center (SOC) can find gaps and optimize those programs.
- Gain perspective from experts that understand the threat landscape. Along with the conducted testing, GoSecure provides a comprehensive customized report, observed Blue Team response data and actionable recommendations.

BENEFITS OF PURPLE TEAM ENGAGEMENTS

- Get rapid but long-lasting improvement in security maturity through the GoSecure "test, fix and test again" approach to Purple Team engagements.
- The collaborative approach to Purple Team engagements offers an opportunity to improve security practices and learn new techniques. The in-house team benefits from knowledge and skill transfer while improving their detection and response processes.
- Purple Team engagements identify areas to allocate people and technology where it's needed most to protect against breaches.
- Purple Team reports detail the changes that have already been accomplished and the resulting improvements to security posture.
BENEFITS OF COLLABORATIVE THREAT HUNTING

- GoSecure experts will collaborate with your in-house team for threat hunting activities based on the risk environment in your organization and using your current security tools.
- Enables organizations to enhance their security controls and update surveillance cases, making the threat hunt repeatable for your in-house team in the future.
- During the engagement, on-demand coaching is available for the in-house team to enhance threat hunting skills and learn from the security experts at GoSecure.
- Flexible, tiered offerings are available based on the level of engagement that best suits the needs of your organization.
