

GOSECURE TITAN

NO MORE ALERT FATIGUE

- The core of the GoSecure Titan® Platform offers easy to understand alerts that predict malicious intent with a level of certainty.
- The alerts and dashboards help organizations prioritize their efforts more effectively.
- GoSecure Titan® automated capabilities contain and terminate known threats before they can execute.
- This allows security analysts to focus on more advanced attacks requiring their immediate attention.

GOSECURE TITAN® PLATFORM

2023

[Expanded protection, broad visibility and scalability in a managed detection and response platform]

The **GoSecure Titan® Platform** consolidates critical security data, provides unmatched visibility, and delivers proven protection with customizable views.

GoSecure Titan® is more than a MXDR platform, and more than a security operations platform. It's a single platform that can balance consolidation, transparency and actionability, allowing cybersecurity professionals from across your organization to stay above the crowd, be in control, act and thrive.

> CENTRALIZED PROTECTION

The **GoSecure Titan® Platform** is the central nervous system of all the technology supported across **GoSecure Titan® Managed Extended Detection and Response (MXDR)**. Our platform not only provides broad visibility and better protection—checking for three times more unique event types than the industry standard, but it also allows organizations to detect more threats, mitigate faster, and lower overall security costs.

> PROOF OF PROTECTION

When you are responsible for managing security, your priority is to deploy a trusted security platform that responds to threats in real-time. In addition to protecting organizations from attacks, delivering a method to see and respond to potential threats is the cornerstone of the **GoSecure Titan® Platform**. With early warnings, the **GoSecure Titan® Platform** can block attacks before they can impact an organization. And with the **GoSecure Titan® Platform** expert, human threat hunters help ensure that threats are addressed quickly and effectively to protect the organization from significant damage. All of this activity is visible via the platform in customizable views, based on the depth and need of the categories and level of reporting you and your organization want to review.

> EXPANDED PROTECTION

With the **GoSecure Titan® Platform**, organizations experience expanded protection in a complete MXDR solution. Together, **GoSecure Titan® NextGen Antivirus (NGAV)** and **GoSecure Titan® Endpoint Detection and Response (EDR)** deliver full-spectrum endpoint detection to expose new malware, ransomware, and fileless threats that circumvent legacy endpoint solutions. In addition, it includes robust **GoSecure Titan® Network Detection and Response (NDR)** capabilities, combining full packet capture, intrusion detection, log capture, and sandboxing, which provides detailed visibility into suspicious behavior on the network. The platform extends detection across the entire path of a threat.

BUILT FOR SCALE

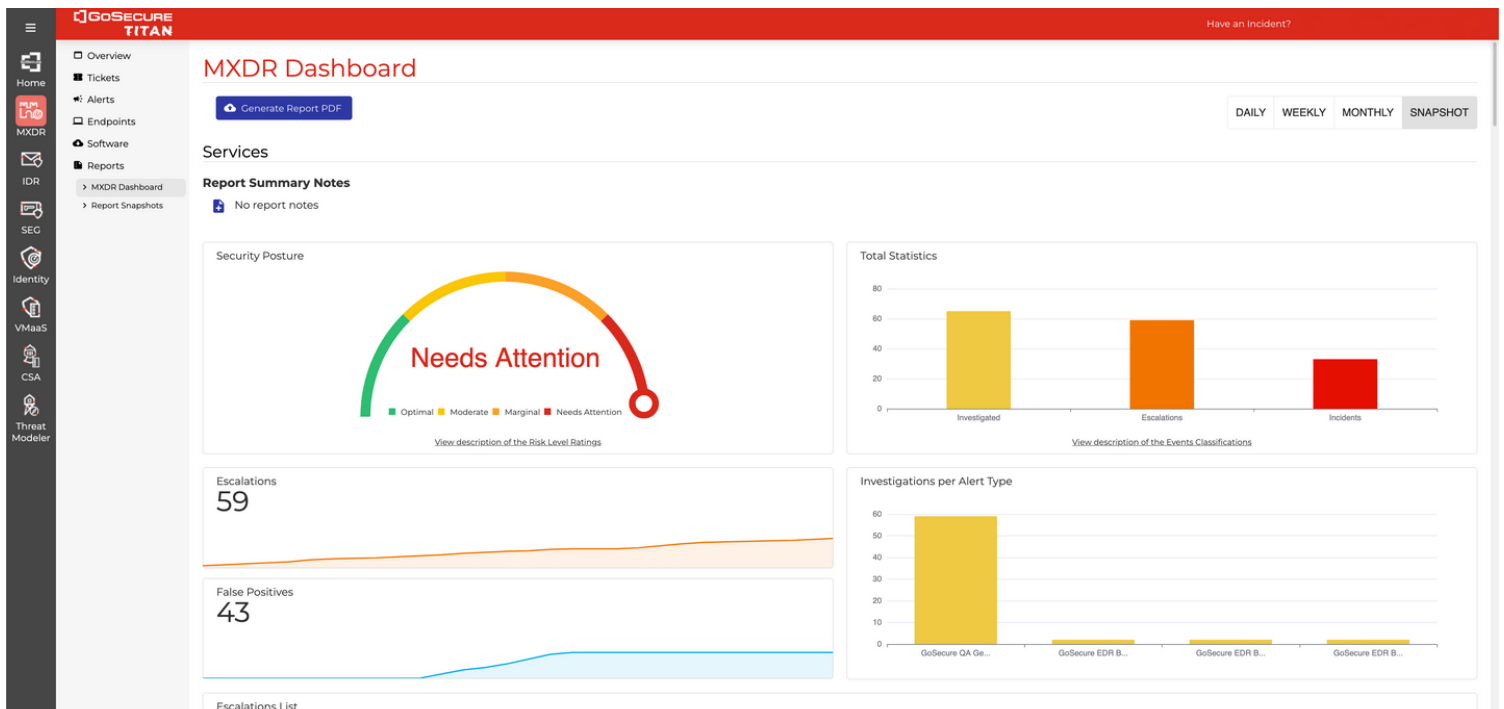

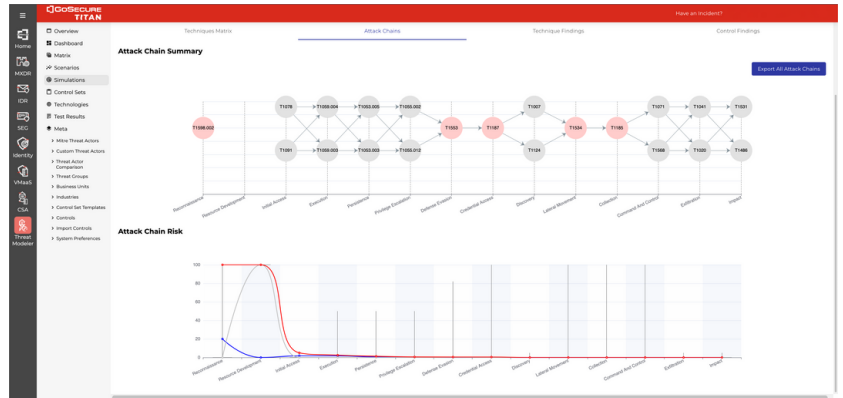

The **GoSecure Titan® Platform** is built to scale with you. It is developed on a Data Lake back-end, and is delivered entirely in the Cloud. The platform consists of three main components:

- Endpoint Sensors
- Collectors
- Real-time Threat Intelligence

With threat intelligence backed by **GoSecure Titan® Intelligence**, the platform is regularly updated with detection capabilities to address the latest attack vectors.

CUSTOMIZATION WITH A CLICK

The GoSecure Titan® dashboards are completely customizable to your specific use cases. Share critical information with executives. Dive deep into the data for technical analysis. See all the details of the attacks that have been prevented and understand the health of your endpoints – in a simple, understandable view

GoSecure is a recognized cybersecurity leader and innovator, pioneering the integration of endpoint, network, and email threat detection into a single Managed Extended Detection and Response (MXDR) service. The GoSecure Titan® platform delivers predictive multi-vector detection, prevention, and response to counter modern cyber threats. GoSecure Titan® MXDR delivers rapid response and active mitigation services that directly touch the customers' network and endpoints. For over 20 years, GoSecure has been helping customers better understand their security gaps and improve their organizational risk and security maturity through MXDR and Professional Services solutions delivered by one of the most trusted and skilled teams in the industry.
