GoSecure TITAN

FOR YOUR VAST TECHNOLOGY NEEDS

Organizations have increased their focus to protect against breaches due to the growing number of vulnerabilities, but the complex landscape of user applications, devices and operating systems creates further challenges to deliver a standard patch management strategy.

GoSecure Titan® Vulnerability Management as a Service (VMaaS) helps achieve continuous control, protection and compliance across a complex terrain of technologies which makes patching no longer a burden.

GoSecure Titan® VMaaS supports: ·

- Operating Systems: Microsoft Windows, OSX, RedHat, Centos, Ubuntu
- Applications: Microsoft Office, Adobe Reader & Flash, Java, Firefox, Chrome, GoToMeeting and Cisco WebEx
- Other third-party application support can be requested

GOSECURE TITAN® VULNERABILITY MANAGEMENT AS A SERVICE

[Keep operating systems and applications updated and in compliance with GoSecure Titan® Vulnerability Management as a Service (VMaaS)]

MAINTAIN YOUR DEFENSES

As the complexity of systems and applications increases, so do the opportunities for attackers to exploit vulnerabilities. Because a majority of breaches are due to unapplied patches, keeping patches and upgrades up to date can work to protect organizations against breaches and help meet compliance requirements.

GoSecure Titan® VMaaS delivers complete solution options for organizations to keep systems and applications updated and in compliance— with managed support available to remediate issues and improve security posture.

GoSecure Titan® VMaaS will:

Identify Applications & Assets

Prioritize Threats

Respond with Updates

CHALLENGES

- Visibility and control over systems and applications across a diverse technology environment.
- Allocating the resources to patch fast enough to keep up with today's emerging threats, while ensuring a quality control of the updates deployed.
- Alert fatigue and lack of visibility.
- Understanding if systems and applications meet compliance standards.

SOLUTION

- GoSecure Titan® VMaaS delivers comprehensive patch management for operating systems and applications, real-time monitoring and compliance reporting— with a client dashboard to monitor status and deployments.
- GoSecure Titan® VMaaS will identify and deploy necessary patches to all systems and applications under contract. All updates are tested though a rigorous quality assurance process prior to deployment, taking the burden off the internal team.
- GoSecure professionals provide continuous scanning and remediation support as an extension of the in-house team— using risk-based prioritization—for those clients who elect managed services within GoSecure Titan® VMaaS.
- GoSecure Titan® VMaaS offers comprehensive reporting on status of patches and scans for systems and applications.

FLEXIBLE PACKAGES

GoSecure Titan® VMaaS is a flexible offering designed to give organizations the right level of protection for their needs. Our options include scanning, patch management, or full-service deployment across covered systems and applications.
