GOSECURE TITAN® VULNERABILITY SCAN ASSESSMENT REPORT (VSAR)

[Understanding your organization's security gaps and how to address them]

GOSECURE TITAN® VSAR INCLUSIONS

A cost effective 2-week engagement designed to:

- Provide you with a complete asset and vulnerability report
- Give you line of sight into gaps in patching and asset issues
- Provide recommendations from our experts on how you can reduce your risk
- Evaluate your existing patching program
- Identify if GoSecure Titan® Vulnerability Management as a Service (VMaaS) is right for you

ABOUT GOSECURE TITAN® VMAAS

GoSecure Titan® VMaaS provides flexible offerings for scanning, patch management or full-service deployment across covered systems and applications.

This service can help with compliance, offer visibility and real-time monitoring, as well as comprehensive reporting

HIDDEN SECURITY GAPS

Organizations struggle to keep pace with the ever-increasing threat landscape and the targeting of vulnerabilities. The result is that even critical patches can take months to deploy.

According to the MITRE.org database, more than 50 vulnerabilities were logged every day on average in 2021 which means that risks from vulnerabilities are continuously being compounded. Most organizations lack the time, tools, and expertise to effectively manage vulnerabilities.

Unfortunately, these shortcomings are often revealed through a breach or other time-consuming incident. Uncover those hidden security gaps before it's too late.

TAKING THE FIRST STEP

You can't fix your problems until you know what problems you have. The GoSecure Titan® Vulnerability Scan Assessment Report provides visibility into vulnerabilities on your network. After analyzing your network, our experts will:

- Produce a complete asset and vulnerability report for you to keep
- Provide a comprehensive evaluation of findings with insights and recommendations
- Conduct a one-hour consultation with you to review the findings and strategize next steps
