

2023

ADVANTAGES

- **Expertise in Firewall Migration:** Specialized proficiency in seamless migration and precise configuration of firewall systems, ensuring alignment with unique security needs.
- **Comprehensive Security Suite:** Extensive services extending beyond firewall migration, encompassing vital security measures for robust cybersecurity defense.
- **Meticulous Assessment and Planning:** Industry-leading practices utilized for meticulous assessment, fortifying defenses while ensuring minimal disruptions and optimal performance.
- **Continual Vigilance and Swift Response:** 24/7 coverage, including daily operations triage and prompt response to alerts by our SOC, ensuring constant protection against emerging threats.

SECURITY OPERATIONS

[Comprehensive Security Fortification Beyond Firewall Management]

GoSecure Security Operations (SecOps) Service stands as a steadfast shield against cyber threats, and our specialized expertise includes firewall policies optimization, migration and configuration, as well as security operation solutions deployments (e.g. VPN, MFA, etc.).

With a commitment to bolstering your organization's defenses, our tailored service offering encompasses a meticulous assessment of your existing security landscape, leveraging industry-leading practices to fortify your defenses. We orchestrate a seamless transition aligned with your security objectives, ensuring minimal disruptions and optimal performance.

GoSecure team brings forth a wealth of experience and a proactive approach to ensure that the configuration process is not only smooth but also aligned with your unique security needs.

As part of its SecOps offering, GoSecure leverages the security expertise from its business partners and its own to address your needs related to the Microsoft security stack. Whether you are considering a change in your licensing strategy, a migration to Azure Cloud environment, and/or the use of MS Defender or MS Sentinel as part of your own security stack, our team of specialists can not only guide and help you make the optimal decision for your business requirements and context, but also assist at every step of the configuration and deployment plan.

Our approach is to make sure you get the best out of your own investments at the best possible cost, which is why we always start by mapping your needs with what you currently have in place and the use you are making out of it.
